

## **BEST PRACTICES IN THE COLLEGE DURING 2018-19**

Govt. degree college is located in one of the most backward areas of Prakasam district in Andhra Pradesh. The main occupation of the people is agriculture. Most of the people in and around are landless agricultural laborers and mason workers. They are hence used to migrate to other areas in search of work and employment. The students are putting it into trouble because of these conditions.

Keeping in view these conditions being faced by the conditions of the arranged mid day meal program for all the students. This program includes attendance of the students somewhat. This program may be continued in the days to come. Unemployment is wide in these areas. To create employment opportunities among the students the college conducts career guidance programs. The college also conducted coaching classes for competitive examinations. Some of the students of our classes participated in the inter college quiz competitions and won the prizes and we hope that this program will enable the students to get employment especially in the government sector.

The college has implemented the following best practices during 2018-19

1. Mid-day Meals Program
2. Coaching for Competitive Exams
3. Celebration of Days and Awareness Programs.
4. Tree Plantation as a part of Vanam-Manam (Forest and Us)
